General Information		
Text		
- DC switching capacity applies to ON/OFF switches. - Do not lubricate or treat contacts. - Switches may only be mounted, connected and set into operation by qualified persons according to the accepted rules of technology. - Use copper wire only. Do not coat the wire end with tin. - Terminals with factory fitted jumper links are tightened during production. Take care during installation to ensure factory fitted links are not lost by undoing both sides of linked terminals. After wiring, all terminal screws must be tightened to recommended torque specifications. - Use only fully insulated cable lugs resp. FASTON receptacles. - After installation of the switches the spacings between the terminals must be sufficient to fulfill the requirement of the applicable standards.
